

## SUNNY-NET Static DNS Setup Instructions for D-Link

### D-Link Wireless Router PPPoE Setup Instructions

First of all, connect to your D-Link wireless router either through Wi-Fi, or Ethernet. Next, open up a web browser and type in the following address: **192.168.0.1**

Username: admin

Password:

Select **MANUAL INTERNET CONNECTION SETUP**. Please continue with the next 6 steps.

1. Select « *PPPoE* ».
2. A little lower down, you will see « *User Name* ». Enter your Internet Username that SUNNY-NET provided.
3. Enter your password in the « *Password* ».
4. Confirm your password under « *Verify Password* ».
5. Select « *Always-On* ».
6. Finish by clicking « *Save Settings* » in the middle part of the page.

DIR-601 // SETUP ADVANCED TOOLS STATUS SUPPORT

**WAN**

Use this section to configure your Internet Connection type. There are several connection types to choose from: Static IP, DHCP, PPPoE, PPTP and L2TP. If you are unsure of your connection method, please contact your Internet Service Provider.

**Note :** If using the PPPoE option, you will need to remove or disable any PPPoE client software on your computers.

**4** Save Settings Don't Save Settings

**INTERNET CONNECTION TYPE**

Choose the mode to be used by the router to connect to the Internet.

My Internet Connection is : PPPoE (Username / Password)

**ADVANCED DNS SERVICE**

Advanced DNS is a free security option that provides Anti-Phishing to protect your Internet connection from fraud and navigation improvements such as auto-correction of common URL typos.

Enable Advanced DNS Service :

**PPPOE INTERNET CONNECTION TYPE :**

Enter the information provided by your Internet Service Provider (ISP).

Address Mode :  Dynamic IP  Static IP

IP Address : 0.0.0.0

User Name : (Internet Username) **1**

Password :  **2**

Verify Password :

Service Name : SUNNY-NET (optional)

Reconnect Mode :  Always on **3**  On demand  Manual

Maximum Idle Time : 0 (minutes, 0=infinite)

Primary DNS Address : 0.0.0.0 (optional)

**Helpful Hints...**

When configuring the router to access the Internet, be sure to choose the correct **Internet Connection Type** from the drop down menu. If you are unsure of which option to choose, contact your **Internet Service Provider (ISP)**.

If you are having trouble accessing the Internet through the router, double check any settings you have entered on this page and verify them with your ISP if needed.
